

Noah Verstraeten

Student Cybersecurity & Cloud

Building and securing networks, starting with my own homelab. I spend my free time optimising and expanding my own homelab. My dream is to work with physical clusters, driven by a strong interest in innovation.

Experience & education

June 2024 – now
Pearle, Antwerpen Student job

November 2023 – July 2023
Carrefour, Schoten Student job

September 2023 – 2027
Cybersecurity & Cloud
AP Hogeschool

July 2022 – August 2022
Pearle, Stabroek Student job

September 2021 – 2023
Multimedia
Kunstkaai

September 2019 – 2021
Graphic media
Kunstkaai

Projects

Apterra
A project organised by AP to place weather stations in Africa. My role is ensuring connectivity and setting up the LoRaWAN network.

Catmap
Inspired by Pwnagotchi. Where Pwnagotchi scans external networks, Catmap maps and scans the internal network instead.

Provis
A visualisation tool for Proxmox, written in Go, that applies changes through the Proxmox API. The long-term goal is an interactive interface like Cisco Packet Tracer or EVE-NG.

Mini Homelab
A Proxmox server used as a test and learning environment, secured with OPNsense and Suricata and reachable from outside through a NetBird tunnel.

Skills

PROGRAMMING

Python · Bash · React · Angular · Go

NETWORKING

Cisco · VMware vSphere · Proxmox · Fortigate · pfSense · FreeBSD · Debian · Fedora · Void Linux · Windows Server · Cloud governance

DEVOPS

Docker · Kubernetes · Jenkins · Ansible · Git · SBOM · CI/CD

SECURITY

Network security · IDS/IPS
